Art Unit: 1615

Continuation of 5. does NOT place the application in condition for allowance because: the combination of the prior art meets the requirements of the invention. The claims require a fosinopril compound and zinc stearate as a lubricant. The examiner directs applicant's attention to example 4 of '492 which teaches a antihypertensive composition with zinc stearate as the lubricant. Applicant includes functional language which does not impart patentability sicne a product is claimed, and the prior art combination fills the requirements of the product.
